

Microsoft Server 08 Server Administrator

MCITP – Windows Server 2008 Server Administrator Description

The New Microsoft Certified IT Professional Certification is made up of two Microsoft Certified Technology Specialist (MCTS) Certifications and a Server Administrator Exam. By earning the MCITP – Windows Server 2008 Server Administrator credential, individuals are demonstrating that they have the skills necessary to lead organizations in the successful administration of the Microsoft Windows Server 2008 platform. Server Administrators are recognized among their peers and managers as leaders in the day-to-day operations management of Windows Server 2008. Demonstrate and communicate your ability to take system-wide ownership of Windows Server 2008 Administration, and increase your organization's return on technology investment, by earning the MCITP: Server Administrator Certification.
