

# Microsoft Azure training and certifications

[aka.ms/AzureTrainCertDeck](https://aka.ms/AzureTrainCertDeck)

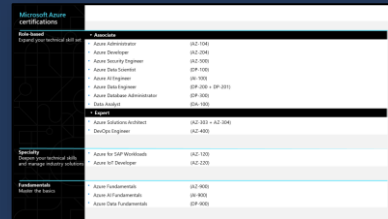

# Welcome to Azure training and certifications

Our approach to learning is to develop an inclusive environment for every stage in an individual's career.

This guide has been created to provide training and certification options to achieve personal success.

## How to use this deck

The following resources will prepare you for the learning experience.

Category	Certification	Exam
Security	Azure Security Engineer	SC-900
	Azure Data Engineer	DP-100
	Azure Site Reliability Engineer	SC-900
	Azure Data Engineer	DP-100
	Azure Site Reliability Engineer	SC-900
Fundamentals	Azure Fundamentals	900
	Azure Data Fundamentals	900

### Certification portfolio

Available certifications and associated exams in portfolio.

### Certification overview

Identify the right candidate profile with the recommended skills knowledge and experience.

### Certification journey

Recommended steps to earn a certification, including preparation resources and opportunities for continue learning.

### Certification learning path

Recommended training content to prepare for certification exams, including self-paced training and Microsoft Official Courseware (MOC) delivered by Learning Partners.

# Microsoft Azure certifications

\*Exam in beta

\*\*Beta exam coming soon

## Role-based

Expand your technical skill set

### ▼ Associate

- Azure Administrator (AZ-104)
- Azure Developer (AZ-204)
- Azure Security Engineer (AZ-500)
- Azure Stack Hub Operator (AZ-600)\*
- Azure Data Scientist (DP-100)
- Azure AI Engineer (AI-102)\*
- Azure Data Engineer (DP-203)\*
- Azure Database Administrator (DP-300)
- Data Analyst (DA-100)

### ▼ Expert

- Azure Solutions Architect (AZ-303 + AZ-304)
- DevOps Engineer (AZ-400)

## Specialty

Deepen your technical skills and manage industry solutions

- Azure for SAP Workloads (AZ-120)
- Windows Virtual Desktop (AZ-140)\*\*
- Azure IoT Developer (AZ-220)

## Fundamentals

Master the basics

- Azure Fundamentals (AZ-900)
- Azure AI Fundamentals (AI-900)
- Azure Data Fundamentals (DP-900)

# Overview of Microsoft Certified: **Azure** Fundamentals

Get started at:  
[aka.ms/AzureCerts\\_Fundamentals](https://aka.ms/AzureCerts_Fundamentals)

## Exam details

### Who is this certification for?

Candidates for this certification should have foundational knowledge of cloud services and how those services are provided with Microsoft Azure.

**AZ-900:**  
Microsoft Azure Fundamentals

#### **Skills measured:**

- Describe cloud concepts
- Describe core Azure services
- Describe security, privacy, compliance, and trust
- Describe Azure pricing Service Level Agreements and Lifecycles

#### **Knowledge and experience:**

A candidate for this exam should be able to demonstrate a fundamental knowledge of cloud concepts, as well as Azure services, workloads, security, privacy, pricing, and support. In addition, a candidate should be familiar with concepts of networking, storage, compute, application support, and application development.

## Certification

Pass certification exam  
**AZ-900** to earn this certification

Microsoft Certified:  
**Azure Fundamentals**

Azure Fundamentals validates foundational knowledge of cloud services and how those services are provided with Microsoft Azure.

#### **Products featured**

- Microsoft Azure

# The journey to Microsoft Certified:

# Azure Fundamentals

Pass certification exam AZ-900 to earn this certification

**Microsoft Certified:**  
Azure Fundamentals

# Azure Data Fundamentals

Get started at:

[aka.ms/AzureCerts\\_DataFundamentals](https://aka.ms/AzureCerts_DataFundamentals)

## Exam details

**DP-900:**  
Microsoft Azure Data Fundamentals

**Skills measured:**

- Describe core data concepts
- Describe how to work with relational data on Azure
- Describe how to work with non-relational data on Azure
- Describe an analytics workload on Azure

**Knowledge and experience:**

A candidate for this exam should be familiar with the concepts of relational and non-relational data, and different types of data workloads such as transactional or analytical.

## Certification

Pass certification exam  
**DP-900** to earn this certification

Microsoft Certified:  
**Azure Data Fundamentals**

Azure Data Fundamentals validates foundational knowledge of core data concepts and how they are implemented using Microsoft Azure data services.

**Products featured**

- Microsoft Azure
- Microsoft SQL Server

## Who is this certification for?

Candidates for this certification should have foundational knowledge of core data concepts and how they are implemented using Microsoft Azure data services.

**Microsoft Certified:**  
Azure AI Fundamentals

# Azure Administrator Associate

## Exam details

**AZ-104:**  
Microsoft Azure Administrator

**Skills measured:**

- Manage Azure identities and governance
- Implement and manage storage
- Deploy and manage Azure compute resources
- Configure and manage virtual networking
- Monitor and back up Azure resources

**Knowledge and experience:**

A candidate for this exam should have at least six months of hands-on experience administering Azure, along with a strong understanding of core Azure services, Azure workloads, security, and governance. In addition, this role should have experience using PowerShell, Azure CLI, Azure portal, and Azure Resource Manager templates.

## Certification

Pass certification exam  
**AZ-104** to earn this certification

Microsoft Certified:  
**Azure Administrator Associate**

Azure Administrators implement, manage, and monitor an organization's Microsoft Azure environment.

**Products featured**

- Microsoft Azure

## Who is this certification for?

Candidates for this certification should have subject matter expertise implementing, managing, and monitoring an organization's Microsoft Azure environment. Responsibilities for this role include implementing, managing, and monitoring identity, governance, storage, compute, and virtual networks in a cloud environment, plus provision, size, monitor, and adjust resources, when needed.

# Azure Security Engineer Associate

Get started at:

[aka.ms/AzureCerts\\_SecurityEngineer](https://aka.ms/AzureCerts_SecurityEngineer)

## Who is this certification for?

Candidates for this certification should have subject matter expertise implementing security controls and threat protection, managing identity and access, and protecting data, applications, and networks in cloud and hybrid environments as part of an end-to-end infrastructure. Responsibilities for this role include maintaining the security posture, identifying and remediating vulnerabilities by using a variety of security tools, implementing threat protection, and responding to security incident escalations.

## Exam details

**AZ-500:**  
Microsoft Azure Security Technologies

### **Skills measured:**

- Manage identity and access
- Implement platform protection
- Manage security operations
- Secure data and applications

### **Knowledge and experience:**

A candidate for this exam should have strong skills in scripting and automation; a deep understanding of networking, virtualization, and cloud N-tier architecture; and a strong familiarity with cloud capabilities and products and services for Azure, plus other Microsoft products and services.

## Certification

Pass certification exam **AZ-500** to earn this certification

Microsoft Certified:  
**Azure Security Engineer Associate**

Azure Security Engineers implement security controls and threat protection, manage identity and access, and protect data, applications, and networks in cloud and hybrid environments as part of an end-to-end infrastructure.

Overview of Microsoft Certified:

# Azure for SAP Workloads Specialty

Get started at:

[aka.ms/AzureCerts\\_SAPWorkloads](https://aka.ms/AzureCerts_SAPWorkloads)

## Exam details

### Who is this certification for?

Candidates for this certification should be architects or engineers with extensive experience and knowledge of the SAP system landscape and industry standards that are specific to the long-term operation of an SAP solution on Microsoft Azure. Responsibilities include making recommendations on services and adjust resources as appropriate for optimal resiliency, performance, scale, provision, size, and monitoring.

**AZ-120:**  
Planning and Administering Microsoft Azure for SAP Workloads

#### **Skills measured:**

- Migrate SAP Workloads to Azure
- Design an Azure Solution to Support SAP Workloads
- Build and Deploy Azure for SAP Workloads
- Validate Azure Infrastructure for SAP Workloads
- Operationalize Azure SAP Architecture

#### **Knowledge and experience:**

A candidate for this exam should have extensive experience and knowledge of SAP applications: SAP HANA, S/4HANA, SAP NetWeaver, SAP BW/4HANA, OS servers for SAP applications and databases, Azure portal, ARM templates, operating systems, virtualization, cloud infrastructure, storage structures, high availability design, disaster recovery design, data protection concepts, and networking.

## Certification

Pass certification exam **AZ-120** to earn this certification

Microsoft Certified:

# DevOps Engineer Expert

Get started at:

[aka.ms/AzureCerts\\_DevOpsEngineer](https://aka.ms/AzureCerts_DevOpsEngineer)

## Who is this certification for?

Candidates for this certification should have subject matter expertise working with people, processes, and technologies to continuously deliver business value.

Candidates must be familiar with both Azure administration and development and must be expert in at least one of these areas.

### Prerequisite

#### Certification option 1

- [Azure Administrator Associate](#)

OR

#### Certification option 2

- [Azure Developer Associate](#)

### Exam details

#### AZ-400:

Designing and Implementing Microsoft DevOps Solutions

#### Skills measured:

- Develop an instrumentation strategy
- Develop a Site Reliability Engineering (SRE) strategy
- Develop a security and compliance plan
- Manage source control
- Facilitate communication and collaboration
- Define and implement continuous integration
- Define and implement a continuous delivery and release management strategy

#### Knowledge and experience:

A candidate for this exam should have expertise implementing strategies for collaboration, code, infrastructure, source control, security, compliance, continuous integration, testing, delivery, monitoring, and feedback. Additionally, a candidate must be familiar with both Azure administration and development and must be expert in at least one of these areas.

### Certification

Pass certification exam **AZ-400** to earn this certification

Microsoft Certified:  
**DevOps Engineer Expert**

DevOps Engineers work with people, processes, and technologies to continuously deliver business value.

Azure Developers design, build, test, and maintain cloud applications and services.  
Explore recommended training resources that will help you prepare for required exams.

# Azure IoT Developer Specialty

## Who is this certification for?

Candidates for this certification should have subject matter expertise developing cloud and edge components of an Azure IoT solution. Responsibilities for this role include managing the device lifecycle—set up, configuration, and maintenance—using cloud services and other tools, implementing designs for Azure IoT solutions including device topology, connectivity, debugging, and security, implementing solutions to manage, monitor, and transform IoT-related data pipelines, deploying Azure IoT Edge components, and configuring device networking on the edge.

## Exam details

**AZ-220:**  
Microsoft Azure IoT Developer

### **Skills measured:**

- Implement the IoT solution infrastructure
- Provision and manage devices
- Implement Edge
- Process and manage data
- Monitor, troubleshoot, and optimize IoT solutions
- Implement security

### **Knowledge and experience:**

A candidate for this exam should have experience implementing the Azure services that form an IoT solution, including data storage options, data analysis, data processing, and platform-as-a-service options. A candidate should also be able to recognize Azure IoT service configuration settings within the code portion of an IoT solution and perform specific IoT coding tasks in at least one Azure-supported language, including C#, Node, C, or Python.

## Certification

Pass certification exam  
**AZ-220** to earn this certification

Microsoft Certified:  
**Azure IoT Developer Specialty**

Azure IoT Developers develop cloud and edge components of an Azure IoT solution.

### **Products featured**

[aka.ms/AzureCerts\\_DatabaseAdmin](https://aka.ms/AzureCerts_DatabaseAdmin)

## Exam details

### Who is this certification for?

Candidates for this certification should be data management specialists with subject matter expertise implementing and managing cloud and on-premises relational databases built on top of Microsoft SQL Server and Azure data services. Responsibilities for this role include database management, availability, and security, plus performance monitoring and optimization of modern relational database solutions.

#### **DP-300:**

Administering Relational Databases on Microsoft Azure (beta)

#### **Skills measured:**

- Plan and implement data platform resources
- Implement a secure environment
- Monitor and optimize operational resources
- Optimize query performance
- Perform automation of tasks
- Plan and implement a High Availability and Disaster Recovery (HADR) environment
- Perform administration by using T-SQL

#### **Knowledge and experience:**

A candidate for this exam should have experience using a variety of methods and tools to perform day-to-day operations, including applying knowledge of using T-SQL.

## Certification

Pass certification exam  
**DP-300** to earn this certification

Microsoft Certified:  
**Azure Database Administrator Associate**

Azure Database Administrators implement and manage cloud and on-premises relational databases built on top of Microsoft SQL Server and Azure data services.

# Azure Data Engineer Associate

## Who is this certification for?

Candidates for this certification should have subject matter expertise supporting business needs by designing and implementing the management, monitoring, security, and privacy of data solutions using the full stack of Microsoft Azure data services to satisfy business needs. Responsibilities for this role include designing and implementing Azure data storage solutions that use relational and non-relational data stores, batch and real-time data processing solutions, and data security and compliance solutions.

### Exam details

**DP-200:**  
Implementing an Azure Data Solution

**Skills measured:**

- Implement data storage solutions
- Manage and develop data processing
- Monitor and optimize data solutions

**Knowledge and experience:**

A candidate for this exam should be able to implement data solutions that use various Azure services like Cosmos DB, Azure SQL Database, Synapse Analytics, Data Lake Storage, Data Factory, Stream Analytics, Databricks, and Blob storage.

**DP-201:**  
Designing an Azure Data Solution

**Skills measured:**

- Design Azure data storage solutions
- Design data processing solutions
- Design for data security and compliance

**Knowledge and experience:**

A candidate for this exam should be able to design data solutions that use various Azure services like Cosmos DB, Azure SQL Database, Synapse Analytics, Data Lake Storage, Data Factory, Stream Analytics, Databricks, and Blob storage.

### Certification

Pass certification exams **DP-200** and **DP-201** to earn this certification

Microsoft Certified:

# Azure AI Engineer Associate

## Who is this certification for?

Candidates for this certification should have subject matter expertise using cognitive services, machine learning, and knowledge mining to architect and implement Microsoft AI solutions involving natural language processing, speech, computer vision, and conversational AI.. Responsibilities for this role include analyzing requirements for AI solutions, recommending the appropriate tools and technologies, and designing and implementing AI solutions that meet scalability and performance requirements.

## Exam details

**AI-100:**  
Designing and Implementing an Azure AI Solution

**Skills measured:**

- Analyze solution requirements
- Design AI solutions
- Implement and monitor AI solutions

**Knowledge and experience:**

A candidate for this exam should have knowledge and experience designing and implementing AI apps and agents that use Microsoft Azure Cognitive Services, Azure Bot Service, Azure Cognitive Search, and data storage in Azure. In addition, a candidate should be able to recommend solutions that use open source technologies, understand the components that make up the Azure AI portfolio and the available data storage options, and understand when a custom API should be developed to meet specific requirements.

## Certification

Pass certification exam **AI-100** to earn this certification

## Who is this certification for?

Candidates for this certification have subject matter expertise integrating, transforming, and consolidating data from various structured and unstructured data systems into structures that are suitable for building analytics solutions.

Responsibilities for this role include helping stakeholders understand the data through exploration, building and maintaining secure and compliant data processing pipelines by using different tools and techniques. This professional uses various Azure data services and languages to store and produce cleansed and enhanced datasets for analysis.

## Exam details

**DP-203:**  
Data Engineering on Microsoft Azure

### Skills measured:

- Design and implement data storage
- Design and develop data processing
- Design and implement data security
- Monitor and optimize data storage and data processing

### Knowledge and experience:

Candidates for this exam must have solid knowledge of data processing languages, such as SQL, Python, or Scala, and they need to understand parallel processing and data architecture patterns.

## Certification

Pass certification exam **DP-203** to earn this certification
