

IMPLEMENTING CISCO SD-WAN SOLUTIONS (ENSDWI) V3.0

IMPLEMENTING CISCO SD-WAN SOLUTIONS (ENSDWI) V3.0

The Implementing Cisco SD-WAN Solutions (ENSDWI) training helps you design, deploy, configure, and manage the Cisco Software-Defined WAN (SD-WAN) solution in a large-scale network, including how to migrate from legacy WAN to Cisco SD-WAN. You will learn best practices for configuring routing protocols in the data center and the branch, and how to implement advanced control, data, and application-aware policies. This training also covers Cisco SD-WAN deployment and migration options, placement of controllers, how to deploy WAN Edge devices, multicast and quality of service (QoS), how to configure Direct Internet Access (DIA) breakout, and how to deploy a Multi-Region Cisco SD-WAN fabric. You will also learn about the various Application Quality of Experience (AppQoE) traffic optimization capabilities. Finally, the training looks at the different Cisco SD-WAN security options available.

How you'll benefit

This class will help you:

- Establish a transport-independent WAN for lower cost and higher flexibility
- Meet Service Level Agreements (SLAs) for business-critical and real-time applications
- Provide secure end-to-end segmentation for protecting critical enterprise compute resources
- Extend seamlessly into the public cloud
- Optimize the user experience for Software-as-a-Service (SaaS) applications

Why Attend with Current Technologies CLC

- Our Instructors are in the top 10% rated by Cisco
- Our Lab has a dedicated 1 Gig Fiber Connection for our Labs
- Our Labs run up to Date Code for all our courses

Who Should Attend

The primary audience for this course is as follows:

- Individuals seeking the Cisco CCNP Enterprise certification or the Cisco Certified Specialist—Enterprise SD-WAN Implementation
- Pre- and post-sales network engineers involved in the installation, support, and troubleshooting of a Cisco SD-WAN overlay network System Installers

OUTLINE

Module 1: Examining the Cisco SD-WAN Architecture

Module 2: Examining Cisco SD-WAN Deployment Options

Module 3: Deploying WAN Edge Devices

Course Duration

5 days

Course Price

\$4,295.00 or 43 CLCs

Methods of Delivery

- Instructor Led
- Virtual ILT
- On-Site

Module 4: Managing Device Configuration

Module 5: Exploring Redundancy, High Availability, and Scalability

Module 6: Enabling Service-Side and Transport-Side Routing

Module 7: Understanding Cisco SD-WAN Policy Configuration Basics

Module 8: Defining Advanced Control Policies

Module 9: Defining Advanced Data Policies

Module 10: Implementing Application Quality of Experience

Module 11: Implementing AAR

Module 12: Examining DIA and Cisco Cloud OnRamp

Module 13: Exploring Cisco SD-WAN Security

Module 14: Designing and Migrating to Cisco SD-WAN

Module 15: Performing Cisco SD-WAN Network Management and Troubleshooting

Module 16: Examining Cisco SD-WAN Multicast Support

LAB OUTLINE

- **Lab 1: Deploying Cisco SD-WAN Controllers**
- **Lab 2: Deploy Cisco SD-WAN Device Using Configuration Group**
- **Lab 3: Configure Cisco SD-WAN Controller Affinity**
- **Lab 4: Implement Service-Side Routing Protocols**
- **Lab 5: Implement Transport Location (TLOC) Extensions**
- **Lab 6: Implement Control Policies**
- **Lab 7: Implement Data Policies**
- **Lab 8: Implement Application-Aware Routing**
- **Lab 9: Implement Branch and Regional Internet Breakouts**
- **Lab 10: Configure Application Firewall**
- **Lab 11: Migrate Branch Sites**
- **Lab 12: Perform Cisco SD-WAN Software Upgrade**
