

Administering Meraki MX (SDWAN/Security) Appliances v2.0 (MER-MXSDWAN)

***WHERE GREAT TRAINING
HAPPENS EVERYDAY!***

Administering Meraki MX (SDWAN/Security) Appliances v2.0 (MER-MXSDWAN)

About this Class

Course Duration

5 Days

Course Price

\$4395.00

43 CLCs

Methods of Delivery

In-Person ILT

Virtual ILT

Onsite ILT

This five-day, instructor-led, hands-on course on the Meraki MX SDWAN/Security course offers comprehensive training on deploying, managing, and troubleshooting the Cisco Meraki MX security and SD-WAN solutions in environments. This course is designed to equip participants with the knowledge and skills necessary to leverage these solutions for enhancing network security, improving operational efficiency, and ensuring compliance standards for data protection and privacy. Through theoretical learning and practical exercises, attendees will gain hands-on experience configuring advanced security features, optimizing traffic flow across wide-area networks, and utilizing cloud management capabilities to monitor and control network devices remotely. By the end of the course, participants will be well-prepared to implement and manage Cisco Meraki MX solutions effectively within departments, ensuring a secure, resilient, and high-performance network infrastructure.

By the conclusion of this course, participants will be well-equipped with the necessary knowledge and skills to ensure the reliability, security, and efficiency of networks using Cisco Meraki MX Security Appliances. This includes a comprehensive understanding of how to design, implement, manage, and troubleshoot these networks effectively, making them invaluable assets to their respective departments.

Administering Meraki MX (SDWAN/Security) Appliances v2.0 (MER-MXSDWAN)

How you will benefit

This class will help you:

- Gain the knowledge and skills to Identify and Resolve security and network-related issues efficiently
- Understand how to leverage tools for Provisioning and Monitoring a Meraki solution using APIs
- Gain practical experience in Configuring MX Interfaces, Addressing, VLANs, and Implementing Security Measures

Why Attend with Current Technologies CLC

- Our Instructors are the top 10% rated by Cisco
- Our Lab has a dedicated 1 Gig Fiber Connection for our Labs
- Our Labs run up to Date Code for all our courses

Who Should Attend

The job roles best suited to the material in this course are:

- Network Engineers
- System Administrators
- IT Professionals
- Technical Support Staff
- Cisco Certified Professionals

Administering Meraki MX (SDWAN/Security) Appliances v2.0 (MER-MXSDWAN)

Objectives

After taking this course, you should be able to:

- Dashboard Navigation and Configuration
- Understanding Meraki MX Licensing
- Organizational and Network Settings Configuration
- Utilization of Templates and Group Policies
- MX Networks and Devices Management
- MX Interfaces, Addressing, and VLAN Configuration
- VPN and Firewall Configuration Across MX Networks
- Implementing SD-WAN and Traffic Shaping
- Site-to-site and Remote Access VPNs
- Access Control, Content Filtering, and Threat Protection
- User Management with Active Directory, ISE, and Radius
- MX Security Appliance Monitoring and Troubleshooting
- Client, Device, and Connectivity Monitoring and Troubleshooting

Administering Meraki MX (SDWAN/Security) Appliances v2.0 (MER-MXSDWAN)

Course Outline

Module 0: Introductions

Module 1: Introduction to Meraki

- Module Topics
- Lesson 1: Why Cisco Meraki?
- Lesson 2: Meraki Product Overview
- Lesson 3: Meraki Support
- Module Summary

Module 2: Meraki MX Licensing

- Module Topics
- Lesson 1: Meraki Licensing Overview
- Lesson 2: Co-Termination Licensing Overview
- Lesson 3: Co-Termination Licensing in the Dashboard
- Lesson 4: Per Device Licensing (PDL) Overview
- Lesson 5: PDL in the Dashboard
- Lesson 6: Subscription Licensing Overview
- Lesson 7: Subscription Licensing in the Dashboard
- Module Summary

Module 3: Meraki MX Security Appliances

- Module Topics
- Lesson 1: MX Models & Features
- Lesson 2: Meraki vMX
- Lesson 3: MX Capabilities & Sizing Guidelines
- Lesson 4: MG - Meraki Cellular Gateway
- Lesson 5: Local Status Page
- Lesson 6: Manage MX Firmware
- Module Summary

Administering Meraki MX (SDWAN/Security) Appliances v2.0 (MER-MXSDWAN)

Course Outline

Module 4: Configuring the Meraki Dashboard

- Module Topics
- Lesson 1: Meraki Dashboard, Organizations, and Networks
- Lesson 2: Organizational - Wide Configure Settings
- Lesson 3: Configuring Administrators
- Lesson 4: Creating Networks and Managing Inventory
- Lesson 5: Organization > Overview Page
- Lesson 6: Configuring Network - Wide Settings
- Lesson 7: Network - Wide Administrators & Users
- Lesson 8: Network - Wide > Add Devices
- Lesson 9: Configuring Location / Mapping Devices
- Module Summary

Module 5: Meraki MX Configuration

- Module Topics
- Lesson 1: Initial Setup using the Appliance Status Page
- Lesson 2: Addressing and VLANs
- Lesson 3: DHCP
- Module Summary

Module 6: Meraki MX Security Configuration

- Module Topics
- Security Introduction
- Firewall Configuration
- Threat Protection
- Content Filtering
- Module Summary

Administering Meraki MX (SDWAN/Security) Appliances v2.0 (MER-MXSDWAN)

Course Outline

Module 7: Meraki Authentication with Active Directory, ISE, and Radius

- Module Topics
- Lesson 1: Managing Users
- Lesson 2: Access Control
- Lesson 3: Meraki Splash Page
- Lesson 4: Active Directory Users and Group Meraki Integration
- Lesson 5: Meraki Integration with Cisco Identity Services Engine (ISE)
- Lesson 6: Meraki Radius Integration
- Module Summary

Module 8: Meraki Adaptive Policy

- Module Topics
- Lesson 1: Adaptive Policy Architecture
- Lesson 2: Configuration
- Lesson 3: AutoVPN transport
- Lesson 4: Compatibility with other Cisco Technologies
- Module Summary

Module 9: Meraki SDWAN Configuration

- Module Topics
- Lesson 1: What is Meraki SD-WAN?
- Lesson 2: How does it work?
- Lesson 3: Designing SD-WAN
- Lesson 4: DIA Design
- Lesson 5: Configuring Meraki SD-WAN
- Lesson 6: Routing with OSPF and BGP
- Lesson 7: Data Center Redundancy
- Lesson 8: Meraki SD-WAN and Traffic Shaping
- Module Summary

Administering Meraki MX (SDWAN/Security) Appliances v2.0 (MER-MXSDWAN)

Course Outline

Module 10: Meraki Integration with Umbrella

- Module Topics
- Lesson 1: Meraki Integration with Umbrella
- Lesson 2: Enabling Umbrella (From the Umbrella Dashboard)
- Lesson 3: Enabling Umbrella (From the Meraki Dashboard)
- Lesson 4: Creating an Umbrella Policy (From the Umbrella Dashboard)
- Lesson 5: Applying Umbrella Policies
- Lesson 6: Using Umbrella for Meraki SDWAN
- Module Summary

Module 11: Meraki Secure Connect (SASE)

- Module Topics
- Lesson 1: Meraki Secure Connect Solution Overview
- Lesson 2: Cisco Secure Connect Account
- Lesson 3: Secure Connect Cloud
- Lesson 4: Configure Client - Based Remote Access Service
- Lesson 5: Define Private Applications and Configure Application and Network Access Policies
- Lesson 6: Configure Internet Usage and Security Policies
- Module Summary

Module 12: MX Client VPNs

- Module Topics
- Lesson 1: Configuring Remote Access VPNs
- Lesson 2: L2TP Client VPN Configuration
- Lesson 3: Cisco AnyConnect VPN Configuration
- Lesson 4: How to Use AnyConnect
- Module Summary

Administering Meraki MX (SDWAN/Security) Appliances v2.0 (MER-MXSDWAN)

Course Outline

Module 13: Meraki IPv6 Configuration

- Module Topics
- Lesson 1: Meraki IPv6 Overview
- Lesson 2: Meraki IPv6 Features on Meraki
- Lesson 3: Meraki IPv6 Dual Stack
- Lesson 4: IPv6 DHCP and Addressing
- Lesson 5: IPv6 Management Protocols
- Lesson 6: IPv6 Security and ACLs
- Lesson 7: Dual-Stack Local Device Management
- Module Summary

Module 14: MX Insight and ThousandEyes

- Module Topics
- Lesson 1: Meraki Insight Introduction
- Lesson 2: Meraki Insight Licensing
- Lesson 3: Meraki Insight Web App Health
- Lesson 4: Meraki Insight WAN Health
- Lesson 5: Meraki Insight VoIP Health
- Lesson 6: Meraki Insight Alerting
- Lesson 7: Thousand Eyes Internet Outages
- Lesson 8: Thousand Eyes Active Application Monitoring
- Module Summary

Module 15: MX Monitoring Troubleshooting

- Module Topics
- Lesson 1: Meraki Troubleshooting Methodology
- Lesson 2: Meraki Help and Support
- Lesson 3: Troubleshooting Uplinks to the Dashboard

Administering Meraki MX (SDWAN/Security) Appliances v2.0 (MER-MXSDWAN)

Course Outline

Cont. Module 15

- Lesson 4: Meraki Event Monitoring
- Lesson 5: Meraki Packet Captures
- Lesson 6: Meraki MX Troubleshooting Tools
- Lesson 7: Troubleshooting WAN Links
- Lesson 7: Troubleshooting Client Connections
- Lesson 8: Troubleshooting Authentication Issues
- Module Summary

Module 16: Meraki MX APIs

- Module Topics
- Lesson 1: Meraki API and Integration Overview
- Lesson 2: Meraki API Technologies and Tools
- Lesson 3: Meraki Dashboard API
- Lesson 4: Using Postman with Meraki
- Lesson 5: Meraki Dashboard API Python Library
- Lesson 6: Use Case - Pulling Statistics from Meraki Devices
- Lesson 7: Meraki Tools
- Lesson 8: Meraki Action Batches
- Module Summary

Module 17: Meraki MX Cloud Integration with VMX

- Module Topics
- Lesson 1: Meraki vMX Overview
- Lesson 2: Meraki vMX Sizing

Administering Meraki MX (SDWAN/Security) Appliances v2.0 (MER-MXSDWAN)

Course Outline

Cont. Module 17

- Lesson 3: Deploying VMX to AWS
- Lesson 4: Deploying VMX to AZURE
- Lesson 5: Deploying VMX to GCP
- Lesson 6: Deploying VMX to NFV / ESXi
- Module Summary
